## **DETAILED ACTION**

### ***Specification***

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because "figure for abstract: figure 2" need to be deleted and the abstract should be in paragraph form. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

**a. The following claims are vague, indefinite, awkwardly, and confusingly worded:**

- i. "it" is recited in claim 1, line 3 and claim 2, line 2.. The limitation should be positively recited with the proper antecedent basis.

### ***Claim Rejections - 35 USC § 103***

Art Unit: 3723

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Herb et al (4274801) in view of Barry (5063983).

b. Herb et al discloses the claimed invention except for a means of view coordinates.

c. Barry discloses a workbench having a platform (11) with two guide rods (22&(25,21 the measuring means ) ) which have measure means for viewing coordinates allowing a workpiece to be aligned.

d. It would have been obvious to one having ordinary skill in the art to have modified the Herb et al device by providing a measuring means on the two guide rods (3&9) which allows to the workpiece to be aligned.

#### ***Allowable Subject Matter***

6. Claims 2 and 3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made for rcAny inquiry concerning this communication or earlier communications from the examiner should be
